Advanced comfort and security

Enjoy the daily benefits of window, door, and patio applications

- Security
- Energy Savings
- Storm Protection
- Light Control
- Privacy
- Noise Reduction
- UV Protection
- Automation

Key Components

Insulated Security Solution

Rollac only uses premium and environmentally friendly foam insulation. Available in a standard weight foam and a high density foam for increased rigidity and security.

Flawless Finish

A special two coat application and separate stove-baked enameled heat treating process provide a high quality finish.

Prevent Shutter Pull-up

Rollac DuraComfort shutters can be equipped with an optional lift prevention system - keeping outsiders from lifting up the curtain with an object providing additional protection.
