

## ***SUBFRAMES***

<b>A-Frame</b>	To build out over an obstacle such as a doorhandle. Build out is for shutter housing and guide rails.
<b>B-Frame</b>	To build out from an obstacle where build out is needed for shutter housing, guide rails and sill angle.
<b>Double I-Frame</b>	To build out for the rails on each sides.
<b>U - Frame</b>	to build out for guide rails and bottom sill. A second cross bar for housing is not needed.
<b>Reverse U - Frame (RU-Frame)</b>	Where build out around a shutter is required but no bottom cross bar needed for sill angle or a second cross bar for the shutter housing.
<b>O-Frame</b>	Where build out around a shutter is required but no second cross bar needed for shutter housing.
