

ROLLAC

Commercial Rolling Shutters

Experience the Security, Comfort, and Protection of Rollac Shutters

Rolling shutters provide a wide range of benefits that you can enjoy every day.

Daily Shutter Benefits

Shutters offer more than just protection - consider these additional benefits:

Security

Keep your property safe when you are at work or away with rolling shutters. Shutters act as a physical barrier to potential criminals, and a visible deterrent that makes potential thieves think twice before even approaching your business.

Energy Savings

By keeping your shutters down during hot and cold times of the year, you can prevent energy loss through your doors and windows.

Light Control

Finally, take complete control of the light in your workplace. Keep mid day glare out of your office for increased productivity. By using optional light slits, you can fine tune daylight to nearly any degree.

Privacy

Rolling shutters allow you to tune out any unwanted onlookers that might be a nuisance and help your team focus on the task at hand.

Noise Reduction

Shutters help reduce the amount of noise entering your office. If you work next to a busy street or noisy neighbor, you know every bit helps.

UV Protection

Office furniture is an expense that ultraviolet rays can damage over time. Now, you can prevent your furniture and other valuables from fading. Rolling shutters cover openings that let damaging sun in.

What is a Rolling Shutter?

The anatomy of what makes a shutter work.

1. Shutter Box

The shutter box houses the internal components such as the motor, axle, gear, and shutter curtain when rolled up. Shutter boxes are available in 45 and 90 degree front faces.

2. Operator

Available in manual and motorized operation. Manual operators for smaller shutter systems, and motorization for easy push button operation as well as automation.

3. Axle

The axle is the interior rolling mechanism that the shutter curtain rolls upon. Larger shutter systems require a large axle to prevent sagging across wider lengths.

4. Side Caps

Heavy duty aluminum end caps connect the housing to the rails. They support the weight of the axle and shutter curtain.

5. Shutter Curtain

The shutter curtain consists of individual slats that link together to form a solid barrier. These slats are available in a foam filled aluminum casing or solid extruded aluminum for maximum strength.

6. Rails

The rails are fixed to the wall, and help guide the shutter curtain up and down. Different rails are available to enhance strength and prevent shutter curtain pullout.

DuraComfort

Regular Foam Filled Solution

The ideal shutter solution for security and comfort

Rollac's DuraComfort line of rolling shutters bring a whole new level of protection to your work place. Utilizing your shutters will make for a more comfortable and productive environment that all employees will appreciate.

Daily Benefits

Store Protection

DuraComfort regular foam shutters offer a solid layer of protection against break ins.

Noise Reduction

Shutters can reduce noise from busy streets and help you focus.

Light Control

Tune out excessive glare and increase work productivity.

Save Energy

Shutters create a barrier that keeps energy from escaping your office's openings.

Rollac recommends automating your rolling shutters. If automated and intelligently controlled, rolling shutters will reduce energy consumption of your home and provide comfort with the touch of a button.

Shutter Profiles

Solution Features at a Glance

Regular Foam Insulation

Regular foam offers excellent insulation and protection against the elements. Upgrade to an optional hard foam for increased durability.

Standard Rails

DuraComfort shutter system comes standard with 2 1/8" extruded aluminum rails.

Light Slits

Take full control over the amount of wind and light entering in your home.

Flawless Finish

Special two coat application and stove-baked enameled heat treating process provide a high quality finish.

Optional Lift Prevention System

Locks the shutter in place when down, which keeps outsiders from prying up the curtain with an object.

ShopGuard

Single Wall Extruded Solution

The ideal shutter solution for security with a view

ShopGuard keeps potential criminals at bay, while allowing your products to still be seen.

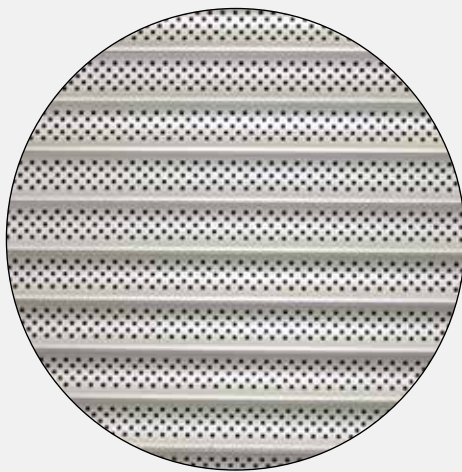

Choose your Punch Pattern

ShopGuard's patented system offer's three different punch patterns for the perfect amount of security and visibility.

Solid

0% visibility when closed.

Grid Punch

15% visibility when closed

Rectangle Punch

44% visibility when closed

Shutter Profiles

The ShopGuard RLL59 is a patented system by Rollac.

US Patents:

- USPTO Patent Number: # US 8,584,731 B1
- USPTO Patent Number: # US 8,857,497 B1
- USPTO Patent Number: # US D601716 S1

Solution Features at a Glance

Extruded Single Wall Construction

ShopGuard shutter curtains are composed of thick extruded aluminum for excellent impact resistance.

High Security Rails

ShopGuard shutter system comes standard with larger 2½" extruded aluminum rails.

Optional Punch Patterns

Take full control over the amount of wind and light entering in your workplace.

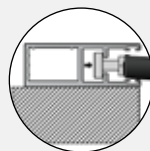

Powder coated Finish

A hard wearing finish that stands up to abuse and will look good for years to come.

Optional Lift Prevention System

Locks the shutter in place when down, which keeps outsiders from prying up the curtain with an object.

End Retention System

The optional ERS locks the shutter curtain into the rails, preventing pull-out under high stress.

SecuraMax Extruded Aluminum Solution

The ideal shutter solution for heavy security and storm protection

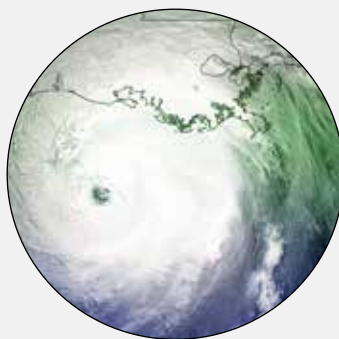

When you don't want to second guess the level of protection you need, SecuraMax is the answer.

Daily Benefits

Heavy Security

SecuraMax Shutters offer the highest level of protection for building security.

Hurricane Protection

Extruded shutters are designed to withstand the heaviest storms.

Code Approved

TX Department of Transportation
Miami Dade
Florida Building Code

Save Energy

Shutters create a barrier that keeps energy from escaping your building.

Rollac recommends automating your rolling shutters. If automated and intelligently controlled, rolling shutters will reduce energy consumption of your home and provide comfort with the touch of a button.

Shutter Profiles

Solution Features at a Glance

Extruded Aluminum Shutter Curtain

Double Walled Aluminum slat profiles are engineered to withstand high levels of abuse.

Heavy Duty Rails

SecuraMax 3" or 3½" ERS rails feature a channel inside the rail that locks the shutter curtain to the rail.

Optional Light Slits

Take full control over the amount of wind and light entering in your home.

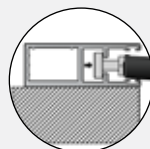

Powder coated Finish

A hard wearing finish that stands up to abuse and will look good for years to come.

Optional Lift Prevention System

Locks the shutter in place when down, which keeps outsiders from prying up the curtain with an object.

End Retention System

The optional ERS locks the shutter curtain into the rails, preventing pull-out under high stress.

Operating Your Shutters

Making your shutters work for you has never been easier. Automated systems that work from smart devices allow you to custom tailor when you open and close the entire shutter system.

Motorized Operation

Remote Control

Smart Device Control

Wireless Wall Switch

Wall Switch

Motorized shutter systems are available with a manual override option, allowing shutters to operate in the event of a power failure.

Manual Operation

Tape Drive

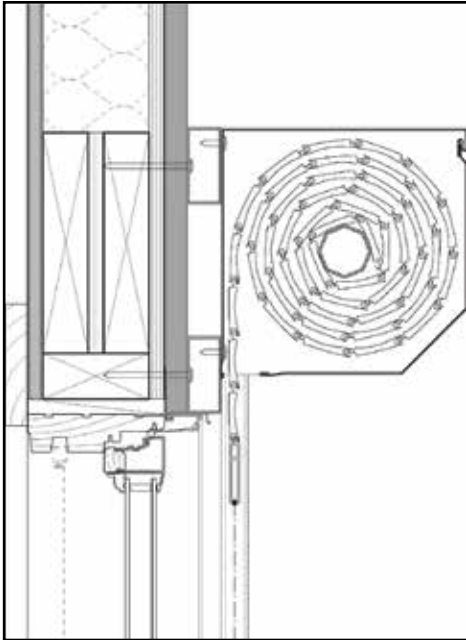

Gear Crank

Keypad

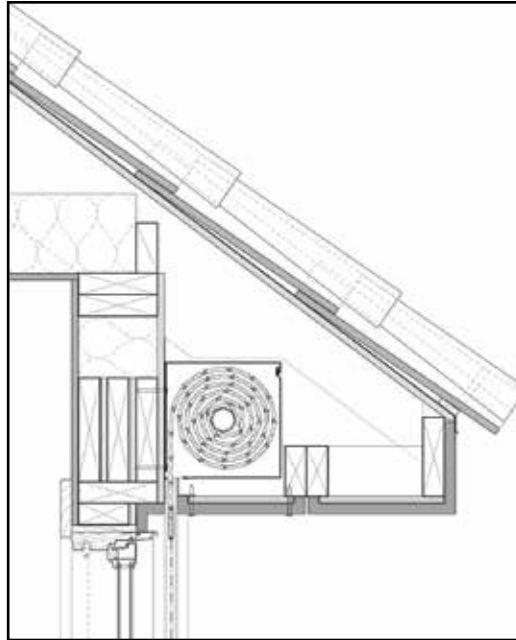

Home automation integration is available. Please consult your Rollac Dealer for more information.

Mounting Options

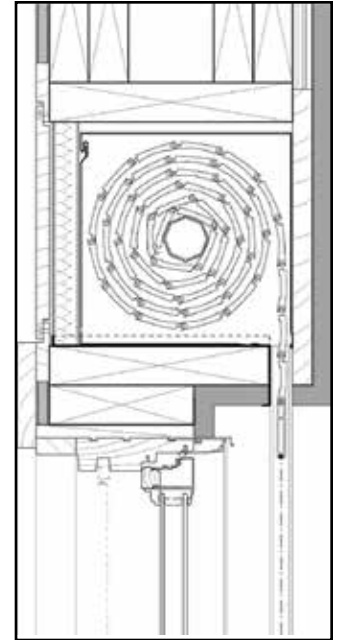

Retrofit

The most common type of shutter installation. This mounting method is used on preexisting structures.

In Soffit

Conceal the box in the soffit space of the roof, lowering the visual presence of rolling shutters.

In Wall

Usually installed during construction phase of a home, in wall mounting allows the box and rails to be concealed inside the walls for a near invisible installation.

Experience Technology Higher Standards

Since 1982, Rollac has operated with a vision of quality, service, and modern technology to produce the best possible product for our customers. Each product is custom manufactured for every single job to ensure the best fit and finish. Regardless if you are looking to enhance security, add comfort to a space, or seek protection from the elements, Rollac has the solution for your home or work environment.

Using the latest technology at hand, all our solutions are engineered in house and suited to accommodate the American market. If you need a rolling shutter to protect from solar heat gain, a shield for security, or Miami Dade wind storm protection, Rollac Rolling Shutters provides the right solution.

Buildings consume 39% of all energy and are also the largest source of carbon dioxide emission in the USA. Therefore, we at Rollac strive to engage in environmentally responsible practices and pledge to integrate principles of sustainability into our rolling shutters and our day to day operations.
