Single Wall Security Shutters
Advanced storefront security

Keep your business protected every day

Window, door, and patio applications

- Security
- Automation
- Light Control*
- Privacy*
- Visibility

* Features available with the solid ShopGuard model

Key Components

Varying Visibility

The Shop Guard can be equipped as a solid shutter, or with an openness of 14% (Grid) or 40% (Rectangle). This allows authorities to look inside but also enables after hour product view.

Patented Technology

The ShopGuard RLL59 Slat is a patented system by Rollac.
US Patents:

- USPTO Patent Number: # US 8,584,731 B1
- USPTO Patent Number: # US 8,857,497 B1
- USPTO Patent Number: # US D601716 S1

Small Housing Size

Large and tall openings are typical for commercial applications. To keep installation space at a minimum, Rollac engineered a patented special single wall profile that rolls compact. This allows for minimum installation space and low visual impact.
