

# Section 6

## Pulleys & Recoil Boxes

### Pulleys

Attaches to side cap and idler insert.

### Recoil / Crank Boxes

Recoil and crank boxes contain the tape which attaches to the pulley and manually operates the shutter curtain. Choose a recoil box based on the mounting style, design and tape size.

### Tape Guides

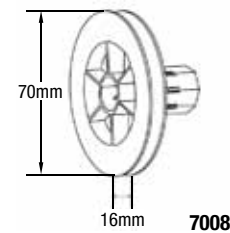

Tape guides align the recoil box tape in line with the pulley.

### Tape

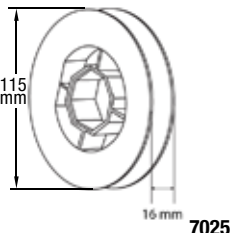

Tape is the physical operator around the pulley that turns the axle. Ensure the tape type chosen is long and strong enough to support manual operation of a shutter.
